To the Board of Directors
San Mateo County Mosquito and Vector Control District
Burlingame, California

In planning and performing our audit of the basic financial statements of San Mateo County Mosquito and Vector Control District for the fiscal year ended June 30, 2014, in accordance with auditing standards generally accepted in the United States of America, we considered its internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinion on the basic financial statements, but not for the purpose of expressing an opinion on the effectiveness of its internal control. Accordingly, we do not express an opinion on the effectiveness of San Mateo County Mosquito and Vector Control District’s internal control.

A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or a combination of control deficiencies, that adversely affects the entity’s ability to initiate, authorize, record, process or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the entity’s financial statements that is more than inconsequential will not be prevented or detected by the entity’s internal control.

A material weakness is a significant deficiency, or a combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the entity’s internal control.

Our consideration of the internal control was for the limited purpose described in the first paragraph and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses, as defined above. We did not identify any deficiencies in internal control that we consider material weaknesses, as defined above.

During our audit, we noted certain matters involving internal controls and other operational matters that are presented for your consideration in this report. We will review the status of these comments during our next engagement. Our comments and recommendations, all of which have been discussed with appropriate members of management, are not intended to be all-inclusive, but rather represent those matters that we considered worthy of your consideration. Our comments and recommendations are submitted as constructive suggestions to assist you in strengthening controls and procedures; they are not intended to reflect on the honesty or integrity of any employee. We will be pleased to discuss these comments in further detail at your convenience, to perform any additional study of these matters, or to assist San Mateo County Mosquito and Vector Control District in implementing the recommendations.

This report is intended solely for the information and use of management of San Mateo County Mosquito and Vector Control District and others within the organization, and is not intended to be, and should not be, used by anyone other than these specified parties.

We thank San Mateo County Mosquito and Vector Control District’s staff for its cooperation during our audit.

March 17, 2015
We have audited the basic financial statements of San Mateo County Mosquito and Vector Control District for the year ended June 30, 2014. Professional standards require that we provide you with the following information related to our audit.

Our Responsibility Under U.S. Generally Accepted Auditing Standards

As stated in our engagement letter dated November 13, 2013, our responsibility, as described by professional standards, is to plan and perform our audit to obtain reasonable, but not absolute, assurance that the basic financial statements are free of material misstatement and are fairly presented in accordance with U.S. generally accepted accounting principles. Because an audit is designed to provide reasonable, but not absolute assurance and because we did not perform a detailed examination of all transactions, there is a risk that material misstatements may exist and not be detected by us.

As part of our audit, we considered the internal control of San Mateo County Mosquito and Vector Control District. Such considerations were solely for the purpose of determining our audit procedures and not to provide any assurance concerning such internal control.

Qualitative Aspects of Accounting Practices
Management is responsible for the selection and use of appropriate accounting policies. In accordance with the terms of our engagement letter, we will advise management about the appropriateness of accounting policies and their application. The significant accounting policies used by San Mateo County Mosquito and Vector Control District are described in Note 1 to the basic financial statements. No new accounting policies were adopted and the application of existing policies was not changed during the year. We noted no transactions entered into by San Mateo County Mosquito and Vector Control District during the year for which there is a lack of authoritative guidance or consensus. There are no significant transactions that have been recognized in the basic financial statements in a different period than when the transaction occurred.

Accounting estimates are an integral part of the basic financial statements prepared by management and are based on management’s knowledge and experience about past and current events and assumptions about future events. Certain accounting estimates are particularly sensitive because of their significance to the basic financial statements and because of the possibility that future events affecting them may differ significantly from those expected. We evaluated the key factors and assumptions used to develop the accounting estimates in determining that they are reasonable in relation to the basic financial statements taken as a whole. The most sensitive estimates affecting the basic financial statements were:

- Accrual and disclosure of compensated absences
- Capital asset lives and depreciation expense
- Actuarial assumptions for pension and other post-employment benefit plans
- Fair value of investments and financial instruments.

Difficulties Encountered in Performing the Audit
We encountered no significant difficulties in dealing with management in performing and completing our audit.

Corrected and Uncorrected Misstatements
Professional standards require us to accumulate all known and likely misstatements identified during the audit, other than those that are trivial, and communicate them to the appropriate level of management. Management has corrected all such misstatements.
Disagreements with Management
For purposes of this letter, professional standards define a disagreement with management as a financial
accounting, reporting, or auditing matter, whether or not resolved to our satisfaction, that could be significant
to the financial statements or the auditors’ report. We are pleased to report that no such disagreements arose
during the course of our audit.

Management Representations
We have requested certain representations from management that are included in the management
representation letter dated March 17, 2015.

Management Consultations with Other Independent Accountants
In some cases, management may decide to consult with other accountants about auditing and accounting
matters, similar to obtaining a “second opinion” on certain situations. If a consultation involves application of
an accounting principle to San Mateo County Mosquito and Vector Control District’s financial statements or
a determination of the type of auditor’s opinion that may be expressed on those statements, our professional
standards require the consulting accountant to check with us to determine that the consultant has all the
relevant facts. To our knowledge, there were no such consultations with other accountants.

Other Audit Findings or Issues
We generally discuss a variety of matters, including the application of accounting principles and auditing
standards, with management each year prior to retention as San Mateo County Mosquito and Vector Control
District’s auditors. However, these discussions occurred in the normal course of our professional relationship
and our responses were not a condition to our retention.
Current Year Observations

1) County Reporting of ACH/EFT Transactions

We noted on the San Mateo County Treasury GL Account # 1010 that ACH/EFT transactions are not transparent. There is a separate bank statement that reports some of these transactions but it is unclear if all electronic transfers are reported on the bank statement. The County Treasury General Ledger report provided by the County lumps together many transactions including the checks paid and electronic transactions. The Finance Director reviews the transactions in detail each month but this requires obtaining additional detailed information from the County.

San Mateo County Mosquito and Vector Control District (the District) should request and obtain from the County a report of all ACH/EFT payments made each month. The District should confirm with the County that the vendors’ names are accurate. The report should be approved by the General Manager.

Recommendation/Status:
The District is working with the County to resolve the transparency issue/County internal control weakness.

2) Vehicle Fuel Purchases

Observation:
The District is currently investigating potential irregularities related to the use of the District’s vehicle fuel credit card. The District is also reviewing their current controls over the use of the District’s fuel credit card.

Recommendation/Status:
The District’s controls revealed the potential error and it is currently being investigated.

Prior Year Observations

There were no prior year observations.
